July 19, 2001

To Whom It May Concern:

In early July of this year, we had MOCO do a conversion project on our sawmills lumber stacker. This project consisted of replacing our sticker infeed, sticker shuttle, carriage and rake off assembly. These modifications were made to our 1982 Lunden model lumber stacker.

From the start of our contacting MOCO, both Chuck and Eric were straight forward and professional in working with us to deliver on what they said they could do.

Our goal in this project was to get to 9 cycles per minute up from 7 cycles and to relieve the physical workload from our operators. We feel both these goals were achieved through MOCO staff.

I would highly recommend MOCO to work on or provide your stacking needs

Sincerely

Vaagen Bros. Lumber, Inc.
